

November 15, 2009

We would be happy to recommend MIDAS CONSTRUCTION INC. for any type of renovation that might be needed. This is the second time we have used this company for house renovations. Angelo Tassone, the owner, made daily inspections on his workers and told us of any complications that he found on the intended job. He kept us up-dated on the work in progress and explained any extra work that was required to finish the projects.

The workers were capable and polite, and did a good clean up of the site when their work was completed. We are very satisfied that an efficient and professional job has been done – a tiled bathroom floor, installation of new sink and faucets, lighting fixture and repainting and new baseboards installed. The driveway has been completely resurfaced and new supports put in the existing car port.

We would be pleased to have them do any other renovations that we may require in the future.
