To Whom It May Concern:

I recently engaged Midas Construction Ltd. to build a "Summer House" in my garden overlooking the beach. The structure was built by Bob and Al and the structure was stained by Al and Lisa. The structure consists of a wooden floor built over a concrete base and surrounding railings and a trellis over which I intend to grow a vine. Built in seats and a corner table form part of the structure and although some sketch plans were made available to Bob, many of the structure's features were designed by Bob as the structure evolved.

The structure is everything I had hoped it would be and the workmanship of the carpenters was thorough, first rate and imaginative.

We enjoyed having Bob, Al and Lisa working on our property and I found doing business with Mr. Angelo Tassone a very pleasant experience. His quote for the job was accurate and his final invoice was fair.

My experience with Angelo and his employees at Midas construction was very good and I have no hesitation in recommending them.
