### Letter of Recommendation

The Midas Construction company, headed up by Angelo Tassone, has performed a wide variety of renovations on our 65-year-old house over the course of the past 8 years. We have no hesitation at all in recommending the work of this company and its excellent workers. Every one of the jobs that we have entrusted to them over the years has been completed to our full and absolute satisfaction. One thing that impressed us from the outset about Mr. Tassone's business practice and style was the fact that he gave us sound advice about what work was truly needed, and what work was not needed, even to the extent of turning down work that might have been profitable for his company. He has always provided excellent advice about the solution to various problems of home maintenance with clear and understandable descriptions of requirements.

The renovations carried out by his company on our home included the repainting of cedar shake exterior; replacement of asphalt roof; the building of a new sidewalk; the replacement of sewer and water pipe and consequent landscaping of a new lawn; chimney pointing; covering of barge boards with hand-folded aluminum; new kitchen floors and cabinetry; complete bathroom renovation and the full replacement of a porch and deck.

We were especially impressed with the quality of the tradesmen that Mr. Tassone organized to perform these renovations. They were without exception skilled and conscientious workers who unfailingly performed with complete professionalism and friendly approachability. In addition, we have found the owner, Angelo Tassone, to be an excellent project manager who personally supervises and coordinates projects with the workmen and the client in order to complete the work as quickly and efficiently as possible.

We have no hesitation in recommending Mr. Tassone for any and all home renovations. Our experience with his honesty and candour and the fine results of the work his company has completed for us over the years, has lead us to have complete confidence in his work, and to rely upon him for all of our construction needs. He has been entirely fair in all his dealings with us, respecting our wishes, offering creative solutions and advice, and providing prices for his work that were always entirely reasonable and fair.
